TILES

We can produce tiles in every wood species we carry. This will be pre-assembled with our hardwood nailers, and ready for installation. Can be made to size to fit clients needs.

Installation

Our installation teams have vast experience in installing decking projects all over the Philippines.

Weathered look

Wood will turn grey with age. – This deck has no oiling. Just natural

Installation

Stainless screws is one of the popular ways of installing, which has the advantage that it is very easy to move a board if needed.

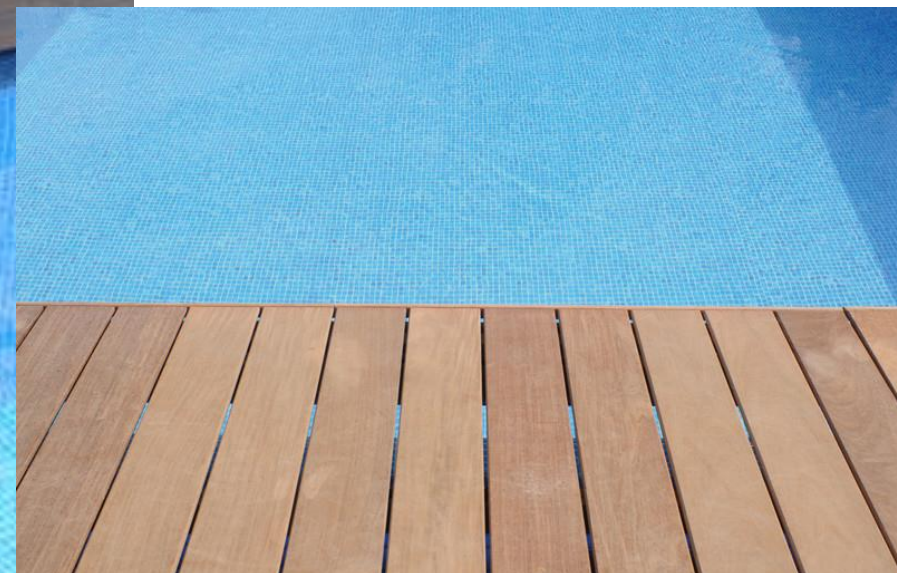

Installation

We are the exclusive distributor of B-Fix invisible fixtures for decking.

This system is increasingly popular and not more expensive than stainless screws.

SOLIDWOOD
www.solidwood.ph

Sales arguments:

We are replacing an increasing number of composite decking with real hardwood, which is not more expensive.

Changing to SOLIDWOOD
Before, and after to the right...

Advantages of real hardwood:

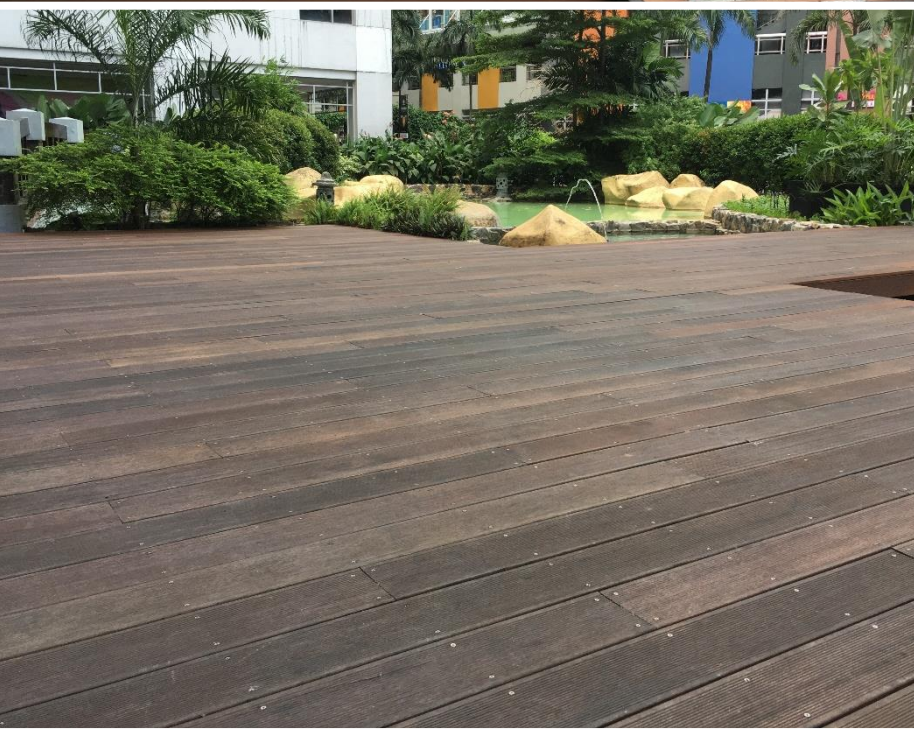

- Natural and sustainable
- Can be resanded many times and appear like new
- Pleasant to walk on. Does not get hot like composites
- Warranty against decay
- Termite resistant*

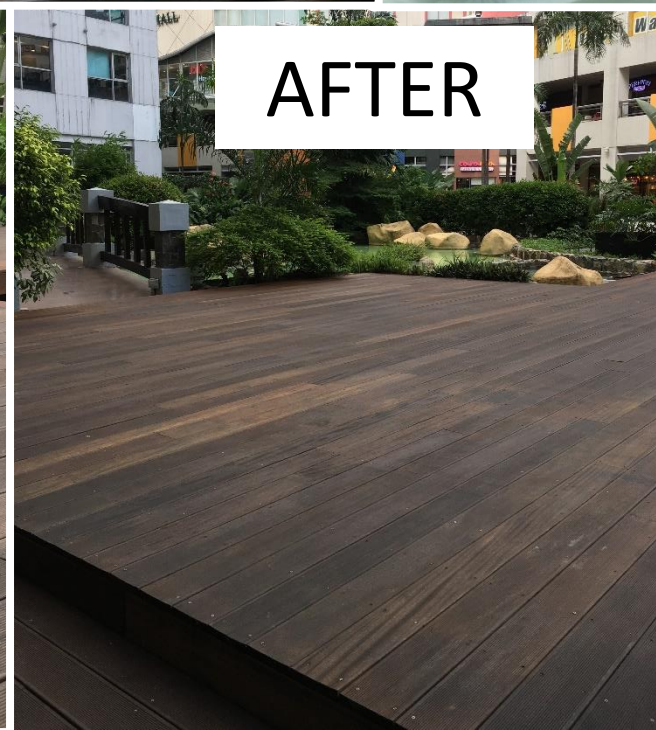

Some of the typical problems with composites.
Fading – splitting and getting very sharp – cracking
– Cannot be repaired easily

BEFORE

AFTER
