# WHY SOLID WOOD?

- Adds value to your investment
- Can be sanded many times
- Several options for finishing
- Easy to repair
- Cheapest in the long run
- Installed on marine plywood for extra protection

- Cannot often be sanded
- Difficult to repair Surface and core parts move differently
- Risk of de-lamination
- Soft woods in core are more prone to rot
- Installed direct on cement, with risk of humidity

# SOLIDWOOD®

Natural - Durable - Sustainable

## TEAK WOOD

The “King” of wood. Can be used indoor and outdoor, and is recognized as one of the best premium wood species in the world

Pre-finished Solid Beech Wood –2-strip  
flooring in our core color selection

**Available and affordable**

The image shows a close-up of a dark brown wood surface with a prominent, wavy grain pattern. The wood has a rich, almost blackish-brown hue. In the top left corner, the JUNCKERS logo is displayed in white, featuring a red double-stroke 'j' above the brand name.

**JUNCKERS**

Dark Coco

The image shows a close-up of a light reddish-brown wood surface with a straight, horizontal grain pattern. The wood has a warm, honey-like tone. In the top left corner, the JUNCKERS logo is displayed in white, featuring a red double-stroke 'j' above the brand name.

**JUNCKERS**

Slyva Red

The image shows a close-up of a greyish-blue wood surface with a wavy grain pattern. The wood has a muted, ashy tone. In the top left corner, the JUNCKERS logo is displayed in black, featuring a red double-stroke 'j' above the brand name.

**JUNCKERS**

Twilight Grey

The image shows a close-up of a light yellowish-brown wood surface with a straight, horizontal grain pattern. The wood has a natural, warm tone. In the top left corner, the JUNCKERS logo is displayed in black, featuring a red double-stroke 'j' above the brand name.
